Study abroad in Munich provides a unique perspective on not only engineering, but also on culture, society, and history. I had a great experience in Munich and would recommend it to anyone who is interested.

The academic program is only the beginning. The experience is really what you make it. Bavaria has so much to offer beyond the classroom. Those of us who went out and experienced the German culture were definitely rewarded.

By studying abroad in the summer, it provides an opportunity to get ahead in both GEs and technical electives.

School Sponsored Excursions (included in tuition):
Munich by bike
BMW factory tour
Dachau Concentration Camp
White Rose Memorial Site
Solar Plant tour
Herrenchiemsee Island trip
Deutsches Museum
Farewell Dinner at Biergarten

Partial scholarships are available, as Munich University of Applied Sciences receives financial support from the German Academic Exchange Service. If you want to apply for one of these scholarships please state in your letter of motivation reasons why you are a good candidate for one of these grants (from 100€ up to 1950€ depending on your native country).
